- Uses UPI for Rewards
- Likes to Save
- Tech-Savvy

I get lots of rewards from Google Pay, but many of them are useless and expire. I'm never sure which ones I can use.

Frequently Used Payment Apps

Google Pay | Paytm | PhonePe

Average Monthly UPI Transaction - 18k

Pain Points

- Unable to find relevant rewards on Google Pay ends up wasting time searching for savings opportunities

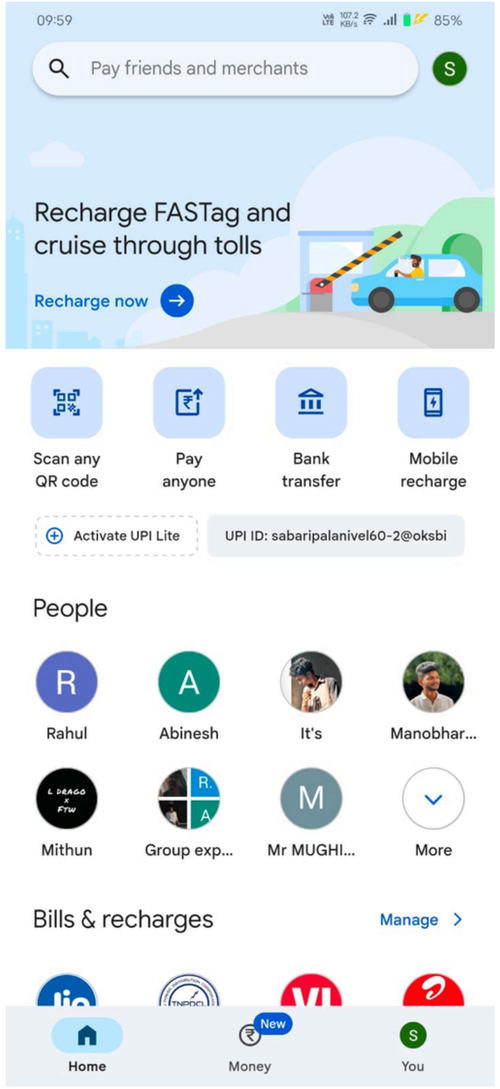
Needs

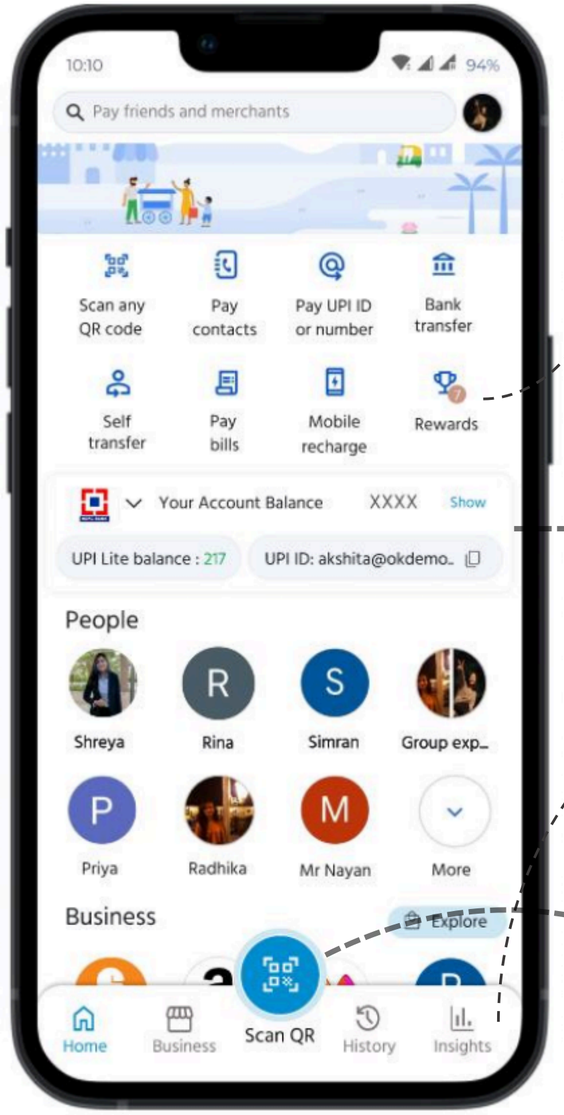
- Seeks an efficient way to discover and utilize relevant rewards to save money

UI Simplification

We've introduced a **simpler UI** that makes navigation smoother, shows your account balance up front, and gives you easy access to rewards.

Current → **Proposed**





Elevated Rewards Section

We've moved rewards from the bottom to the top of the screen and added a badge to highlight the ones you haven't discovered yet. This makes them easier to spot and encourages more engagement.

Quick Account Balance Check

Your account balance helps you make smarter financial decisions, while your UPI ID is always handy for quick and easy sharing

Addition of Navigation Bar

A permanent bottom bar gives you quick one-tap access to key features, while also highlighting 'Explore Business' to make it easier to discover and use.

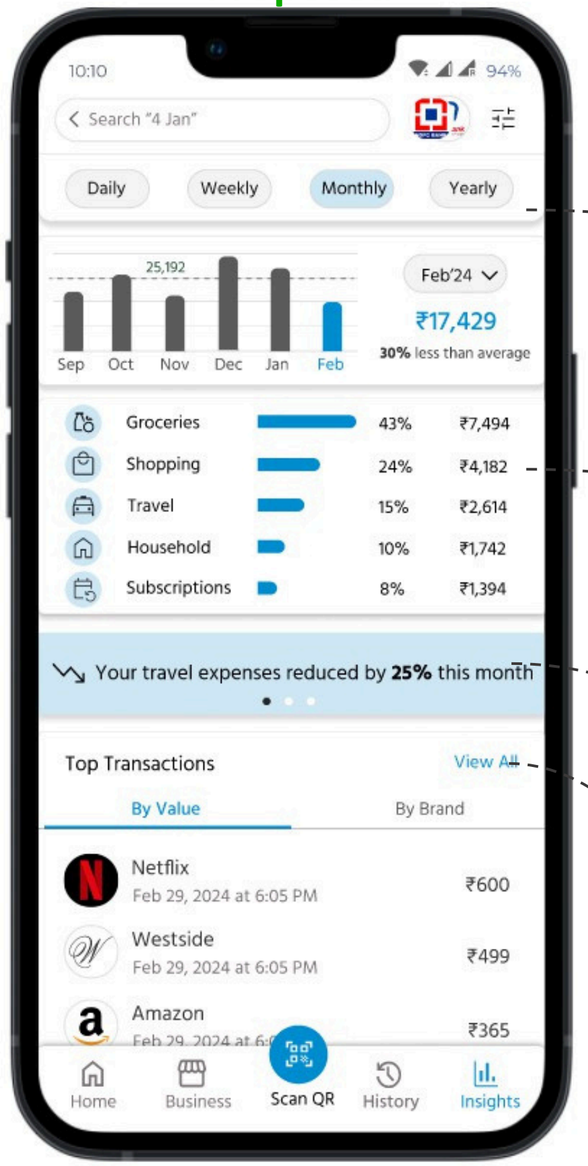
Easy QR Scanning

Since Scan QR is such an important feature, we've placed it right at the center of the navigation bar—making it easier to reach with your thumb.

Transaction Categorization & Insights

Introducing **insights based on categories**, timeframes and brands for all your expenses. Now you can see exactly where your money goes!

Proposed



Spending Trends

Easily track your spending habits over time with options to view transactions daily, weekly, monthly, or yearly. Compare your current spending to previous periods, gaining insights into your expenses

Category Spending Breakdown

See exactly where your money goes by tracking how much you spend on categories like groceries, shopping, and travel across different time periods.

Expense Insights

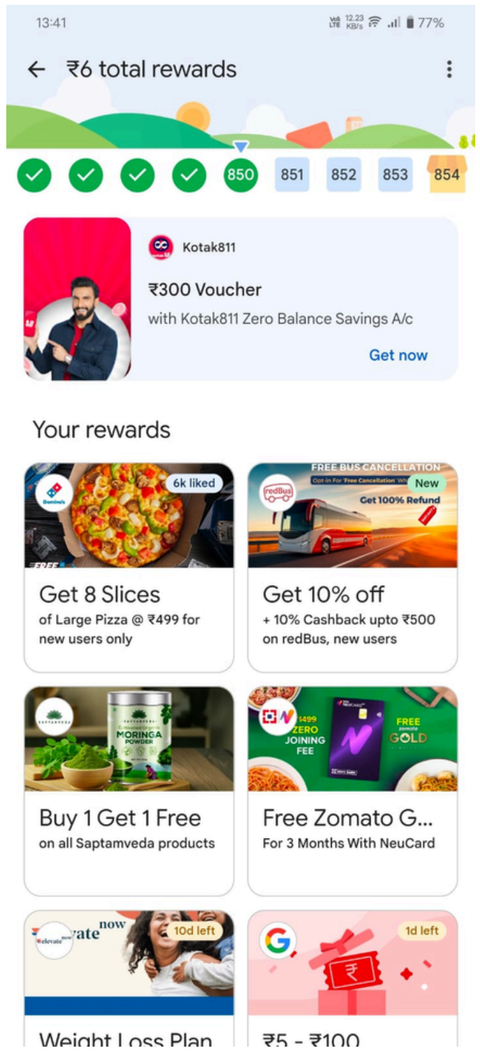
Get personalized insights based on your spending like trends on specific brands and categories, plus weekly and monthly comparisons to help you stay on top of your finances.

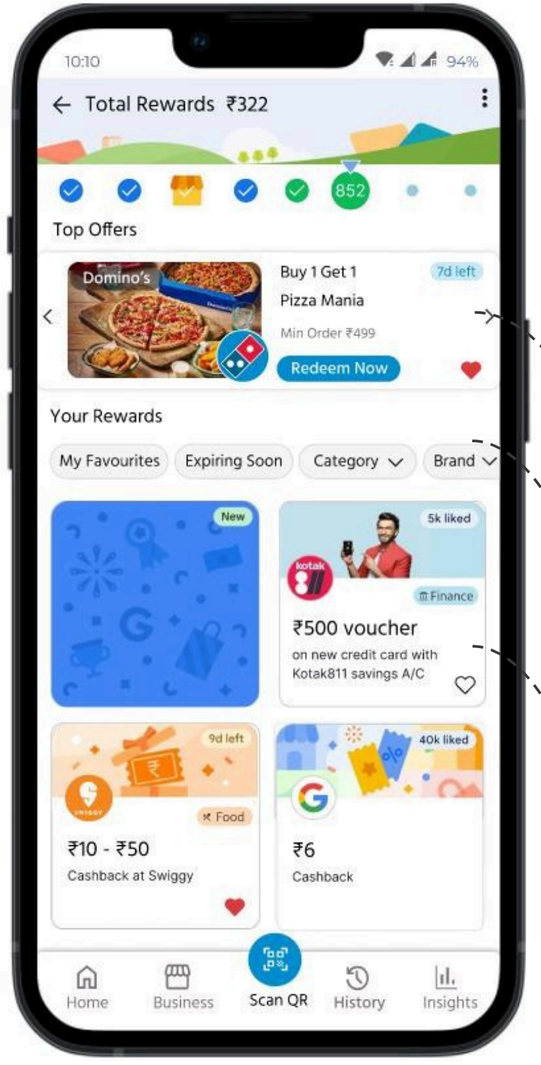
View Top Transactions

Easily spot your biggest transactions and filter them by brand or amount to better analyze your spending.

Reward Enhancement

Current → **Proposed**





Introducing a **suite of features** for all reward lovers. Discovering and redeeming rewards in Google Pay just got easier and more personalized.

Smart Rewards, Powered by Google Search

Google Pay uses your Google Search history to suggest rewards that match your interests. For example, if you often search for fitness, you might get rewards from brands like HealthifyMe

Top Rewards, One Tap Away

A prominent banner highlights the best and most timely offers, with a quick redemption option so you can easily grab the top rewards

Rewards Filtering

Easily find rewards that suit you by filtering through categories, brands, favorites, or those expiring soon.

Categorization and Wish List

Rewards are automatically sorted by brand for easy browsing, and you can mark your favorites to keep track of what you love.
